Ice Storage Cooling Project

Typical electric load TUNCE 800

Electric load profile with thermal storage

Logos: WEB, CALMAC, TRANE

The presentation board contains two line graphs. The left graph, titled 'Typical electric load TUNCE 800', shows a peak in electric load during the day, with a blue area representing 'Load Shed' and a yellow area representing 'Peak Load'. The right graph, titled 'Electric load profile with thermal storage', shows a significantly reduced peak in electric load during the day, with a blue area representing 'Load Shed' and a yellow area representing 'Peak Load'. Below the graphs are the logos for WEB (Water & Sewerage Board), CALMAC (Construction Materials Association of Curaçao), and TRANE (HVAC systems). To the right of the logos is an image of two large ice storage blocks.
